

1310t Optical Module

Overview

The GSFP-1310T-20-SMF from Dahua is a high-performance gigabit optical module designed for efficient data transmission. Built with a single mode single fiber architecture, this module supports a transmission distance of up to 20 km, making it ideal for both short and long-distance. Use one of the options below to locate your desired product. Speed of Optical Port Industrial Optical Module Series is a hot-pluggable device with a unique sturdy design. Developed to adapt to even the harshest of environments, it has a wide operating temperature range and is Plug and Play (PnP). Usage media converters with the ability to exchange SFP modules is particularly preferred because of its versatility, for. Modern security systems need to send huge amounts of video data over long distances without slowing down.
