

# 1U Standard Enclosure for Photovoltaic Power Stations NEMA4X

## Overview

NEMACO™ NEMA 4X enclosures are built for environments where corrosion is as much a threat as moisture, constructed from 304 or 316 stainless steel with ASTM A967 passivation for superior long-term resistance to rust, chemicals, and harsh conditions. Select the right electrical enclosure for your environment and the accessories you'll need to get it mounted and connected. Choose from our selection of NEMA 4X enclosures, including over 6,800 products in a wide range of styles and sizes. Type 1 Enclosures constructed for indoor use to provide a degree of protection to personnel against access to hazardous parts and to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt). Type 2 Enclosures constructed for indoor. Box products are used to contain or enclose materials or equipment in a variety of contexts; plastic or metallic boxes suitable for constructing enclosures for electronic equipment such as guitar pedals, equipment cases for transporting tools or equipment, console style enclosures convenient for. NEMA 4X enclosures are primarily intended for outdoor use and offer a superior level of protection from corrosion and extreme environments. We narrow the catalog with each one.
