

24-core G651 non-metallic flame-retardant optical cable

Overview

Universal (Indoor/Outdoor) dry core (not longitudinal watertight) tight buffered optical fiber distribution cable with Low Smoke Zero Halogen outer jacket. they boast high flame-retardant properties and excellent tensile strength, making them ideal for conduit and aerial installation. available in multiple specifications from 4 cores to 48. ITU-T (International Telecommunication Union) defines several single-mode fiber standards, including G. Among these, commonly used standards are G. This article intends to provide a clear explanation of G. A1 vs. Universal OFC CLT (gel-free tube): GLASS YARNS + LSZH + CST + LSZH with 1 gel-free Tube of Ø3. The cable core is. GYFTZY type optical cable is a non-metal reinforced component, loose tube layer twisted filled type, low smoke halogen-free sheathed outdoor optical cable for communication. * Light weight, small diameter, easy to lay. * Excellent mechanical and temperature performance.
