

288-core connector box

Overview

288 cores fiber optic cross connect cabinet CY-T118-288 is used in ODN networks to connect trunk cables, distribution cables and optical splitter interfaces with 24 splice trays and SMC structure. SMC composite material offers high strength, anti-aging. The main business includes optical fiber trunk, optical fiber home, machine room wiring, data center wiring, network wiring and other solutions; It also provides communication equipment, such as optical fiber cables, copper cables, ODF,DDF, MDF cabling components, ODN components, service cabinets. 288 Core SMC fiber optic cross connect cabinet outdoor cabinet 1. Description Fiber optic Cable transfer Cabinet is the equipment mainly used for outdoor cable connections, distribution and dispatch, and through optical fiber activities and patch cable connect the fiber optic cable and the core. The optical cross-connection Cabinet short for OCC, or some other place call it Optical Distribution Cabinet (ODC) or Fiber Distribution Terminal (FDT), is a device designed for indoor/outdoor cable management. generally the OCC/ODC/FDT consists of several part, like integrated splicing unit, PLC. Built-in direct splice unit is capable for providing direct connection function. The cabinet is with excellent performance, safe and reliable, flexible scheduling, and is.
