

# Advanced Equipment for Fiber Optic Cable Maintenance

## Overview

Fiber optic tools are specialized instruments designed for installing, terminating, splicing, testing, and maintaining fiber optic cables. Unlike copper cabling, optical fiber requires precise handling, clean end faces, and accurate measurement to avoid signal loss and. According to the Fiber Optic Association, optical power measurement is the most fundamental parameter in fiber optic testing and is required for nearly every test scenario. Technicians use this combination to measure insertion loss across installed links, confirming that connectors, splices, and. Our fiber optic termination kits, inspection tools, and cleaning supplies allow both lab and field technicians to complete reliable assembly of fiber optic systems. Our termination kits, for example, are equipped with all of the necessary tools — pin and socket polishing tools, jacket strippers. Torontech is a global leader in providing a full range of Optical Fibre Cable Testing Machines (OFC Testers), engineered with cutting-edge Canadian technology to deliver the highest precision, durability, and performance in the industry. Our advanced OFC testing solutions are trusted worldwide by. Fiber optic cable means your data is traveling at the speed of light. We offer fusion splicers, reflectometers, fiber cleavers, fiber optic network tool kits, fiber optic kevlar cutters, fiber optic testers, optical fiber identifiers, optical power meters, optical laser sources, fiber optic networks repair & maintenance.
