

# Argentina builds fiber optic communication facilities

## Overview

Argentina's National Communications Agency (ENACOM) is driving a comprehensive initiative under the National Connectivity Plan to expand fiber optic and 5G network infrastructure. The plan aims to ensure efficient and measurable connectivity across the entire national territory. The Federal Internet Plan network will use state-owned telecommunications and satellite company ARSAT's fiber optic network as a provider of data transport services at a wholesale level and offer access to local internet service providers, co-ops, municipalities, and SMEs. The program. Telecom Argentina has completed a major infrastructure project in the city of La Paz, Entre Ríos, with an investment of over 466 million pesos. This project covers approximately 410 blocks and seeks to enhance. The big three operators have plans to expand the fiber optics footprint. The operation seeks to improve digital connectivity infrastructure in remote areas, increase the capacity of the National Data Center, and improve the. Telecom Argentina expects to end this year with 260 5G sites deployed, which would mean adding approximately 160 more sites in the remainder of the year.
