

Armored optical cable type gyts

Overview

GYTS (Steel Tape Armored) is an outdoor loose tube fiber optic cable designed for harsh environments. It features corrugated steel tape (CST) armor for mechanical protection and a waterproof PE sheath, making it suitable for aerial, duct, and direct burial installations. Central steel wire boosts overall strength, importantly. Water-blocking gel prevents any kind of moisture damage. Suitable for duct and direct buried application with fiber counts from 2cores to 432cores for both singlemode and multimode. Features: -Up to 432 fiber cores. -The loose tube stranding technology make the fibers have. Loose tube construction, tubes jelly filled, elements (tubes and fillers when necessary) laid up around metallic central strength member, polyester yarns used to bind the cable core, filling compound filled in the apertures of the cable core, two ripcords, steel tape armored, then PE outer sheath.
