

# BESS Energy Storage System Remote Monitoring Type for Hospital Use

## Overview

Touchless™ Monitoring solutions leverage visual and thermal sensors to provide a continuous, 24/7 view of high-value assets and equipment at BESS facilities. Intenance, reduced CO<sub>2</sub> emissions and enhanced ROI assessment in just one solution. All ABB devices are typically provided by open communication protocols such as Modbus TCP/IP or Modbus RTU. It is y easy to create a remote monitoring system by connecting them iliary contact or clean contact is. At Power Saving Solutions (PSS), we design and install tailored BESS solutions to enhance energy resilience in healthcare, reduce operational costs, and support sustainability goals. Reliable power is critical in healthcare, where even a brief outage can put lives at risk. HMS solutions enable communication inside Battery Energy Storage Systems and integration. A BESS (Battery Energy Storage System) is an advanced solution for hospitals that goes beyond simple electrical backup.
