

Bahrain 830nm laser diode model

Overview

The PL-FP-830-B-A81-SA-14BF High brightness, high quality, and high reliability are the foundation of our single mode product line. LD-PD's 830nm single mode laser modules are available with up to 70mW of continuous output power from a 14-pin butterfly packaged fiber. Popular applications include Raman Spectroscopy and Medical treatments. Why choose a single-mode diode?

Structurally speaking, single-mode. This 830 nm laser diode has a singlemode fiber (Hi780) and an FC/APC fiber connector. It is also available with various OPTIONS such as PM fiber and/or FBG (fiber Bragg grating) for a narrow and stable emission spectrum centered at 830 nm (scroll down to see all options, and prices). They have either free space or fiber coupled outputs. B016JXKXOO Adjusted 5V 830nm Focusable Ir Infrared Laser Dot Diode Module 16x68mm with US-Plug Adapter and Heatsink Have any Query?
