

CE Certified GPON Device 400G

Overview

Our 400G QSFP112 FR4 transceiver enables compact cost-effective high-capacity connectivity for next-generation data centers. Supporting 2km over single-mode fiber with 4 CWDM lanes (1271-1331nm) using PAM4 modulation, this module delivers 4 dB link budget at 425 Gbps aggregate. A compact 1U 400G switch built for AI clusters, storage fabrics, and high-speed aggregation, featuring four 400G QSFP56-DD ports, dual 10 Gigabit Ethernet, and RouterOS v7. With hot-swap power supplies, robust cooling, and low power consumption, it delivers ultra-high bandwidth, wire-speed. Gigabit Ethernet, meaning an Ethernet connection that can transmit traffic at a rate of 1 gigabit per second (Gbps), was introduced in 1999. Terabit Ethernet is used to describe a switch fabric capable of handling numerous ports at speeds of 100 Gbps and above. In this blog, Brodie Gage explores how distributed AI training is reshaping optical infrastructure—and details how Ciena is advancing the coherent and photonic innovations powering.
