

Cable trays can be used to hang lights

Overview

The tray, in general, is for exclusive support of tray cables and necessary attachments required for the distribution of that. You can take the rule; if the Code does not specifically prohibits it, it is allowed. The cable support lengths and fittings can basically be designed as cable trays, cable ladders or mesh cable trays, in which cables are routed. Fittings can, on the one hand, be used for horizontal or vertical changing of the routing direction or, on the other, to change the height or width of the. Your electrical system is supported by a cable tray hanging system. It contains the wires in a secure, tidy, and elevated state. They are not intended to be used as ladders, walk ways or support for people as this can cause personal injury and also damage the system and any. Can a wet location T8 light fixture be mounted to a vertical cable tray. The cable tray is mounted in side a wind turbine tower.
