

Can a fiber optic PC interface be directly connected to a router

Overview

Q: Can I plug a fiber optic cable directly into a router?

A: Only if your router has an SFP port designed for fiber. Q: Do I need a special router for fiber optic internet?

A: While not all routers support fiber, many modern models. The process to connect fiber optic cable to router requires careful attention to detail, but I'll walk you through every critical step with the precision and clarity you deserve. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly. A fiber optic service will require an "ONT" which connects to the fiber cable, and provides an Ethernet port. Most computers are not equipped with the necessary hardware to interface directly with fiber optic cables. @Kristijorgji: "Media converters" will not work for you, because they deal with a different kind of network; they're made for Ethernet while it's pretty likely that you have GPON, and that needs more than a media converter;. I have a fibre optic cable incoming to an ONS, on the way out of the ONS is also a fibre optic cable which goes directly into a router which has a fibre optic port.
