

China's network cabinets are genuine and of high quality

Overview

OTSCABLE is a leading server rack and cabinet manufacturer in China specializing in producing high quality standard 19" rack, 21" rack, 23" rack and custom server racks. We offer low-cost network rack cabinet solutions for telecom, datacom and other communication networking needs. The wall mount rack cabinet is an economical and cost effective solution for mounting 19" rack server equipment to a wall. It's ideally built for limited areas for LAN networks. You may also use this as your home network cabinet solution for rack-mounting switches. Our wall mount rack is made seamlessly with 16 gauge high-strength steel and finished. This is our standard 19" rack cabinet. Designs may vary from a curved perforated front door and double section rear door or the conventional rectangular-shaped front steel door. These network racks enable ventilation rate of above 80%. The top and bottom wiring channels can be closed and adjustable and its backside has a pair of vertical cable management. This server rack cabinet enclosure has a meshed double door for proper ventilation and ease of maneuvering during maintenance. Like the other models, it has a top cable entry, and bottom cable entry. You may also have us customize the size of your network rack to accommodate more airflow for 19" rack equipment for large processing server units. Otscable offers low cost solutions for customizing server racks for industrial network systems that can be more functional, cheap, yet robust for your company needs. Configurations may accommodate the following:
