

Custom-made Southern European Copper Tube Busbars

Overview

We flexibly manufacture suitable & safe busbars for your switchgear made of copper or aluminium. In addition to the realisation of complex shapes, we also take on the assembly work of the DC link rails. With decades of experience and a deep understanding of conductive materials, we support you in every phase of your project – from choosing the optimal conductive. MSS International is the manufacturer with the experience and global reach to offer efficiency, reliability, customisation, and delivery at scale for any project or product. MSS International uses top-grade Copper ETP and OF grades to meet specific electrical requirements. Our solid copper bar. As a leader in copper processing on the European market, we have extensive production capacities for copper machined components and other metals parts. Our main specialisation, accounting for 90% of production, is the processing of copper and the manufacture of a wide range of products from it for. The use of busbars for power transmission combines flexibility, durability and quick installation in a wide range of applications.

Article Content
