

Fusion Fiber Optic Module

Overview

The FOSM is an upgrade component for all Panduit rack mount fiber enclosures. It is ideal for splicing OS2, OM1, OM2 and OM3/OM4/OM5 fiber to factory-terminated pigtails and is suitable for applications where fusion splicing yields installation time and labor cost benefits. The fiber optic splice module (FOSM) shall house and protect fiber optic splices, guarantee proper fiber cable management and bend radius control, and allow for clear labeling and logical organization of the fiber optic splices. The FOSM shall support 24 fusion splices or 12 mechanical splices in. Fusion fiber optic splicing provides a permanent fusion connection between fibers and offers a lower insertion loss versus mechanical splicing.
