

Ggd distribution box housing

Overview

The ALAN Low Voltage Distribution Cabinet GGD is a highly durable and versatile solution for housing electrical distribution systems. This cabinet is engineered with advanced features to ensure safety, security, and efficiency in managing low-voltage power. It is suitable for communities, shopping malls, schools, supermarkets, substations, industrial enterprises and other power users, with AC 50Hz, rated voltage 400V, 690V, rated current 1000 ~ 3150A power distribution system, used for power conversion, distribution and control device of the power. The GGD AC low-voltage distribution cabinet is suitable for power distribution systems with AC 50Hz, rated voltage of 380V, and rated current up to 3150A. It is designed for ease of use, simple maintenance, and maximum operational uptime, making it a preferred choice for a wide range of AC 380V distribution networks. It has two or more functions of metering.
