

# Guyana Interconnect Advantage Data Center

## Overview

The technology firm and the Government of the Co-operative Republic of Guyana this week announced they have signed a landmark Memorandum of Understanding (MoU) to build and operate an artificial intelligence (AI) data center of up to 100MW in Wales, Guyana. AI chip company Cerebras is to develop a large data center in the South American country of Guyana. -based Cerebras Systems, the. Guyana's intended AI center will be a direct spin-off of the Berbice gas project, providing stable energy to support large-scale digital infrastructure (Google image) Guyana's first Artificial Intelligence (AI) Data Center will be built in Berbice, powered by energy from the country's second gas. The interconnect market focuses on high-speed data transfer solutions that link multiple data centers. This is essential for organizations in Guyana aiming to improve redundancy and disaster recovery capabilities.
