

High-precision mesh cable trays

Overview

Crafted with precision-welded wire mesh, these trays provide excellent airflow and quick heat dissipation, ensuring the longevity and performance of cables. Marlin Steel's wire mesh cable trays are designed for high-performance cable management in data centers, industrial manufacturing, power distribution systems, and commercial infrastructure projects. Engineered for durability and airflow, our systems provide a robust, flexible, and easy-to-install. Constructed from high-quality welded steel wire, Cablofil® Wire Mesh Cable Tray is the result of decades of research and over 94,000 miles of installed tray across the globe. From heavy power cable pathways on oil drilling platforms to data center cabling, explore the cable tray that's strong yet. Wire Mesh Basket Cable Tray - Stainless Steel or Electro-Galvanized Options with Flexible Routing The E-Line TLS series Wire Mesh Cable Tray systems allow easy cable exit through the spaces in the mesh structure—downward, to the right, or to the left. Due to the different materials and surface finishes, they can be used in many different areas, both indoors and outdoors. Typical areas of application include data centres, industrial plants or hygienic environments. Our product range includes stainless steel cable trays, galvanised cable trays, and wire cable trays, available in multiple cable tray types — closed, perforated, ladder, and wire-mesh. It offers genuinely flexible cable management, making it possible to create multiple configurations in a vast array of finishes for optimum integration in any.
