

How to fix fireproof partitions on cable trays

Overview

A simple and effective solution would be “Sleeve Systems. ” where cable trays are stopped a few feet short of the fire barrier, a sleeve installed and the tray picked up again on the other side of the barrier. Therefore, it is crucial to set up fire-blocking sections (fire sections/fire partitions) on cable trays and select appropriate fire-blocking sections (fire sections/fire partitions) materials. Fire resistant bridge partitions should be made of non combustible materials such as gypsum board, mineral wool board, aluminum-plastic board, etc. * Two (2) sticks of moldable putty (part number FSP-MPS) are also needed for each opening. UL Listed Systems Concrete Wall - C-AJ-4056 3 HR F-Rating, 3/4 HR T-Rating Gypsum. Cable tray installation must comply with specific technical standards to ensure electrical safety, system reliability, and long-term maintainability. This guide walks you through everything—testing standards, methods, equipment, and what the results mean for.
