

How to restart fiber optic cable

Overview

It's important not to tamper with the fiber optic cable. Only use the reset button if directed by Fidium Support. Resetting the fiber internet router or modem allows it to refresh and clear any temporary glitches or errors that may be causing connectivity problems. It essentially reboots the device and restarts all its processes, which can often resolve issues like slow internet speed, network connectivity. For folks with fiber, how often do you reboot your ONT?

I'm toying with the idea of switching from cable to fiber. It's usually installed at your home or business by your ISP and serves as the. Several reasons can cause the LOS light to blink red: Fiber Optic Cable Damage: A physical cut or bend in the fiber optic cable can disrupt the signal. Service Outage: ISP maintenance or a local service outage can interrupt your connection. Loose or Damaged Connections: Improperly connected cables. A quick restart of the devices is a good way to remedy this.
