

How to train fiber optic cables without tools

An Extensive Library of Self-Developed Products

Overview

Here you will find free online self-study courses, tutorials, textbooks, videos and links to other FOA pages that will help you learn about fiber optics and premises cabling. Fibre optic cable training is essential for anyone looking to work with modern communication networks, as these cables form the backbone of today's internet and telecommunications systems. With their ability to transmit data at lightning-fast speeds over long distances, fibre optics are a crucial. Fiber U is the free online learning website of the FOA - the Fiber Optic Association, the international professional association and certifying body devoted to the development of a skilled workforce in fiber optics and telecommunication. Before diving deeper into mechanical splicing, it's helpful to understand the two basic types of fiber splicing used in the field: 1. Fusion Splicing Fusion. Select your course and available date with a member of the Fibreplus Training team Complete the Course Registration Form Online Once your deposit is paid, you will receive a registration letter and we will see you on your course. CFOTs have a broad knowledge, skills and abilities (KSAs) in fiber optics that can be applied to almost any job - design.

Article Content

Fiber U Lesson Plan: Basic Skills Lab, Remote

This is a basic skills lab for fiber optic novices covering how fiber optic links and cable plants work, cable preparation, splicing, termination and testing. You will be

Preparing your Fiber Optic Cable for Connectors or Splices
