

# I don't want to put the router in the fiber optic box

## Overview

The typical solution is install the fiber modem in the best place for the fiber, and then run a single ethernet line to your router. If it's an all-in-one box you can probably get it changed. I can't move the router - too complicated. Is it ok to run an Ethernet cable internally from ONT box to the router?

Or does router need to be plugged directly into it?

I'm not with BT atm - my plan is to switch to them when I upgrade to Full fibre. do BT offer an installation service for this type. My home recently (FINALLY!) got 10g fiber for insanely cheap which is amazing news, but my existing WiFi router (a mesh system I want to keep due to \$\$/broke) only supports a 1Gbps WAN/LAN port. Instead of upgrading my router, I'm considering placing an unmanaged 10gb switch between my modem and. The reason I ask, is that the customer service rep for Ziplly says that I will not need to purchase a modem and that the router I linked them: link will be able to be hooked up straight to the fiber they are installing. This doesn't sound right and my googling makes me think this is wrong. So for anyone who has upgraded to. Is AT&T fiber run directly to inside home and customer's router or to a junction box outside the house where the connection is made?

I am considering getting AT&T fiber Internet service as my ISP. In this guide, we'll walk you through how to connect a fiber optic cable to a router safely and efficiently. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly.
