

IK10 Corrugated Communication Conduit for Island Use

Overview

Double wall underground conduit, made in polyethylene, ideal for installation and protection of cables and electrical conduits in buildings and housing. Resistance to impact: 20J = IK10. Protection index: IP54, with couplings. Flame retardant: it is. IK10 Maximum Standard Rating (20 J) Withstands a 5 kg hammer dropped 400mm, suitable for exposed installations, public areas, and locations subject to deliberate abuse or severe mechanical stress. The coordinated IK ratings across conduits, fittings, and glands ensure complete pathway integrity. Designed by Courant, a specialist in sheaths, tubes and pipes for electricity, sanitation and public works, Flexichoc is an electrical sheath which offers IK 10 mechanical protection for underground connections. With regard to purchase orders, the agreed particulars shall prevail. Today, MicroCables range from 6 to 432-fiber. Insulating, Bendable, Transversely Elastic, Corrugated Conduit System.
