

Installation Method of Fireproof Cable Trays in Burkina Faso

Overview

Cable trays and busways at floor level or at slab penetrations shall have a waterstop no less than 50 mm in height. At slab penetrations, provide 20–30 mm of firestopping and install a fire-support plate at the top. Sealing shall be tight and reliable, without visible. Cable tray installation must comply with specific technical standards to ensure electrical safety, system reliability, and long-term maintainability. This document outlines the key requirements for cable tray layout, installation, and fireproofing in industrial and commercial environments. We specialize in cable trays, cable ladders, trunking, wire mesh trays, and accessories that meet international safety. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0. The core fibers inside this FireMaster Cable Tray Wrap are made using Morgan Advanced Materials patented Superwool[®], low biopersistent manufacturing technology.
