

Israel ADSS single-mode optical cable

Overview

This single-mode fiber optic cable is an all-dielectric aerial cable that can be used in aerial optical networks, made with single-mode fiber according to ITU/TIA G652D. This cable is resistant to ultraviolet rays due to the use of black high-density polyethylene (HDPE). Fiber Optic Cable 258 Original Std ADSS Flex-Span ADSS New Std ADSS Applications • Electric utility transmission lines – Typically framed under conductors • EHV environments – Tracking-resistant options available Features • Up to 432 fibers in cable – Gel-Free Buffer Tube options available – up to. Tensile Strength, Long-Term Max. In the following, the optical, structural and mechanical properties of ADSS single mode 48-core optical fiber cable have been discussed. A minimum ends with red and green adhesive cap respectively. A protective wrap shall be. ADSS cable is a type of fiber optic cable that is strong enough to support itself between structures without containing conductive metal elements.
