

Israel Smart Cold Aisle 2U Warranty

Overview

Warranty: This Vertiv™ product is warranted to be free of defects in material and workmanship for a period of (3) Year from Assembly or (42) months from Shipment. Active flow controller automatically adjusts fan speeds based on air pressure, saving up to 40% fan energy. Accommodates aisle widths of 972mm (3ft), 1268mm (4ft), and 1860 (6ft), even single-row aisles. The SmartAisle offering optimizes infrastructure deployment and management with an intelligent row-based system that integrates data center racks, power, row cooling, aisle containment, monitoring and control technologies for spaces with up to 40 racks. The basic principle of the Smart Aisle system is to limit mixing of cold and warm air in space in order to achieve the highest possible electricity savings when cooling IT equipment. Row-based containment solutions support both standard and non-uniform hot/cold aisle applications.
