

# Latest Standards for Fiber Optic Cable Pull-out

## Overview

3-E “Optical Fiber Cabling and Components Standard” was developed by the TIA TR-42. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. APPENDIX A - COVER SHEET / TOC 52. CHECK. The TIA 568 standard for premises cabling is used by most manufacturers and users of premises cabling systems in the US. Internationally, IEC/ISO 11801 is very similar, although there are differences in various countries. Scope: This Standard specifies performance, transmission, and test and measurement requirements for premises optical fiber cable. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. During installation, all curvatures should be smooth.
