

# Lc optical cable termination

## Overview

LC fiber cable with two LC connectors terminated on either ends, is the most commonly used fiber optic cable type. An optical fiber connector enables quicker connection and disconnection than splicing. They come in various types like SC, LC, ST, and MTP, each designed for specific. With the LC termination kit, Graded-Index HCS® (GiHCS®) Optical Fiber in 50/230, 62.5/230, and the original Step-Index HCS 200/230  $\mu\text{m}$  sizes can be field terminated with LC connectors. This comprehensive guide outlines the step-by-step process, drawing from industry best practices. Before starting, assemble the necessary tools and materials: Use only high-quality. We terminate fiber optic cable two ways - with connectors that can mate two fibers to create a temporary joint and/or connect the fiber to a piece of network gear or with splices which create a permanent joint between the two fibers. These terminations must be of the right style, installed in a. This guide provides instructions for the Extron Fiber Optic Termination Kit.
