

# Materials for Dutch Fireproof Cable Trays

## Overview

Fireproofing Measures for Cable Trays Galvanized steel, Stainless steel, Fire-resistant coated trays, Flame-retardant plastic composites. There are several material choices available for cable trays in today's market, the most popular choices are steel (HDG/SS), aluminum, PVC and FRP/GRP. However, there is not a common consensus on how these material types compare to each other in fire conditions. So, we put them to test! Take a look. Fire safety and fire resistance are vital part of responsible electrical designing and installation. Meka Pro has tested and continues to test its products and cable management systems' fire resistance with the cables installed and connected according to the temperature curve in the EN 1363-1. Fire resistance is a key factor when selecting cable trays for areas where fire hazards are present. Materials like steel. FyreWrap® Cable Insulation from Alkegen is a thin, flexible insulation wrap designed to provide fire protective enclosures around cable trays and conduit.
