

Mounting a USB flash drive on an Indonesian fiber optic router

Overview

Connect the USB drive to the USB port on your router. Enter the router's IP address in the server address field, preceded by smb:// (e. When you want to install the Openwrt packages and find our router does not have enough flash memory, you can mount a USB drive or SD card as an external disk to install those packages onto it, like AdGuard Home. AiDisk combines simple FTP settings with the ASUS DDNS service to share files with friends easily no matter when and where the user is. Users will be able to easily create their own FTP servers. But instead of constantly emailing documents, swapping around flash drives, or using cloud storage, you can turn your router into a NAS (Network Attached Storage). This setup transforms your router into a central hub for connectivity, allowing all devices on your Wi-Fi or Ethernet network to access and. For this, I am using a Linksys E4200 Dual-Band Wi-Fi router and a 64GB flash drive.
