

# Pole-mounted switches for distribution network automation

## Overview

Pole-mounted switches are essential components in 10kV overhead distribution lines, particularly in suburban and rural power networks. Scada-Mate Switches are integer style three-pole, group-operated load interrupter switches available in voltage ratings of 14. The HZW32-12/M630 series magnetic control pole-mounted circuit breaker is an outdoor distribution device with a rated voltage of 12kV and a three-phase. This is a total end-to-end solution for secondary distribution substations, comprising of 'packaged' compact substation and grid automation solution cabinet to facilitate digitalization. Their flexible designs include options for local and remote operation, as well as integration with automation and automatic transfer control solutions. Our. CYG SUNRI's independently developed New Solution of Integrating Pole-Mounted Primary Equipment and Secondary Equipment Based on Internet of Things adopts various technologies such as all-electronic sensors, capacitance extraction, and low power consumption perception terminals.
