

Real Version of Explosive Price Increases in Network Server Racks

Overview

2026 Hardware Price Surge: What You Need to Know NOW AI data centers are swallowing up DDR5, DRAM, and flash storage — and the ripple effects are hitting every business. Cisco, Dell, HPE, and others are preparing major price increases (9%–40%+) across servers, storage . Dell announced server price increases as early as December 2025, with Lenovo following suit in January. Samsung and SK Hynix raised prices on server dynamic random-access memory (DRAM). The shortage of servers based on graphics processing units (GPUs) has evolved from a quarterly issue into a. The biggest near-term drivers are not always CPUs or chassis—pricing is being pushed primarily by memory (DRAM) and flash storage (NAND/SSD), compounded by AI-driven demand and procurement volatility. Internal sign-off took 30 days. When the customer came back to confirm, the same configuration was priced at \$306,000. Cisco's new. NAND flash contract prices surged over 60% in November 2025. TrendForce revised its 4Q25 DRAM forecast from 8-13% to 18-23% growth due to strong CSP demand.
