

Revenue from telecommunications towers

Overview

The global telecom tower market was valued at \$68.7 billion in 2024, growing 7% from 2023 to 2024, and reaching \$112.6 billion by the end of the forecast period. A telecom tower is a freestanding mast, pole, free-standing tower, or other structure designed and primarily used for a public utility to support wireless telecommunications facility antennas. I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and revenue estimates. The global telecommunications network relies heavily on telecom towers because they are the primary reason they have become a premier asset class for global infrastructure investors. Tenants for the tower industry are mainly telecom providers but can also include cable television providers and radio broadcasters, depending. The telecom tower market size has grown strongly in recent years.
