

# SC port optical module 10g

## Overview

The SFP+ optical module supports a link length of 20km on a single-mode optical fiber through an SC interface. A broad range of industry-compliant SFP+ modules for 10 Gigabit Ethernet deployments in diverse networking environments. The Cisco ® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider. Ultra-Fast Data Rate The BiDi SFP+ transceiver module offers an impressive data rate of 10Gbps, ensuring fast and efficient transfers for all your network applications. Ideal for high-performance environments, this module is perfect for streaming, online gaming, and storage networks. Trusted by 260K+. Explore new heights of connectivity with the Miljet MJ-XGSPON10G-OLT optical transceiver. This equipment offers both symmetric Downstream and Upstream speeds of 10Gbps, as well as the option of asymmetric speeds of 10Gbps for Downstream and 2. Its robust construction, including. With the increasing demand for high-speed optical communications in data centers, enterprise networks, and carrier networks, 10G BiDi SFP+ optical modules have become a mainstream short-haul optical communication solution due to their single-fiber bidirectional (BiDi) transmission characteristics.
