

Safety of Temporary Land Use Distribution Boxes

Overview

Use only certified and periodically inspected distribution boxes. Workers need power for tools, lighting, pumps, welding equipment, lifting devices, testing instruments, and temporary offices. Cables get pulled across the ground. While the requirements for safely distributing power at construction sites, street fairs, carnivals, convention centers, and the like attempt to mimic those for permanent installations, the manner in which that is achieved is. Temporary power distribution boxes provide a safer way to manage power while keeping your workspace tidy. They handle everything from simple 120/240V single-phase loads to powerful. Provide dry, stable ground and sufficient distance from water streams or mud. The total power of connected machines is underestimated while additional users are added after installation. When combined with our specialty boxes and carts, Southwire. Power Temp Systems' Power Distribution Boxes are a UL Certified safe solution for dsitributing temporary power on any job site.
