

# Singapore 200G optical transceiver module

## Overview

200G QSFP-DD/QSFP56 optical transceiver is a high-speed network transmission device designed for 200G Ethernet interconnection. It uses PAM4 modulation technology and can achieve transmission at different distances on single-mode or multi-mode optical fibers. Click to get your 200GBE transceiver modules from nearby warehouses. Our 2 x 100G modules use Duplex CS connectors, boasting a 40 percent size reduction from Duplex LC. Designed in compact form factors such as QSFP56 and QSFP-DD, these transceivers support 200G. SULITON has the ability to provide OEM and ODM of dozens of optical modules from 1G to 800G at a price that satisfies you. It is compatible with most switches (CISCO, Huawei, etc) Compared to existing QSFP28, it has fewer optical components, excellent power consumption, and cost performance.
