

South Sudanese pigtail fiber sizes and shapes

Overview

Single Mode Pigtail (OS2): Has a $9/125\mu\text{m}$ core and is used for long-distance, high-bandwidth applications. Using a fusion splicer (or mechanical splice joint), you will be able to connect a large range of fiber cables and terminate within an enclosure. These pigtails are designed to be installed. Fibre Pigtails are terminated with fibre optic connectors at only one side of the cable, while leaving the other side to be terminated via fusion or mechanical splicing. Ensure a reliable, low-loss. Single mode, PC, UPC, APC, SC fiber optic pigtails, $9/125$, $50/125$, 62 . We supply SC fiber optic pigtails, including the single mode and multimode types, these SC fiber pigtails are with premium grade connectors and with typical 0. As for cable, there are $900\mu\text{m}$ buffered, 2mm and 3mm jacketed types.
