

Switch fiber optic light is red

Overview

A red LOS (Loss of Signal) light on a fiber modem indicates no optical signal reception, often due to fiber cable damage or loose connections. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. If you find that the Optical/Config/PON Light on your Fibre ONT (Optical Network Terminal) box is flashing, has gone off, or has gone red, this indicates there may be an issue with the fibre connection coming into your property. What Can I Do?

First, please check that the optical cable which comes. Your Fiber cabling is complete and you've inserted brand-new SFPs, cleaned the connectors, and used what looks like a perfect fiber patch cable. yet the link LEDs stay red or amber. 99% of the time, the problem is fiber polarity —. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do. This is displaying a solid red LOS light - which I understand to stand for Loss of Service. No Light: The ONT is not receiving.
