

# The S7706 switch s optical port is not recognized

## Overview

This document describes how to check the switch interface or port status and how to locate an interface physically down fault and restore the interface to the up state. Hardware failures: (Video) How does Huawei PEN innovate for a green and low-carbon future S7700&S8700&S9700&S12700&S16700 Series S7706: Access product manuals, HedEx documents, product images and visio stencils. The S7706 switches are high-end smart routing switches designed for next-generation enterprise networks. Agile features supported in V200R005C00 and later versions 2. Innovative Cluster Switching System (CSS) 4. Left-to-rear air flow. When installing a copper cable, optical module, or optical fiber, you can determine that it has been installed properly after hearing a click. Hardware failures: include hardware. The S7706 chassis is 10 U high (1 U = 44).

Optical Monitoring not working ICX7450/ ICX7550

Hi, I have two switches, ICX7450 and ICX7550. Below is a table with switch models and tested image SW versions. On both switches, I could not get

S7700 Series Smart Routing Switches

The S7700 can use service ports as cluster ports, so that cluster members can be connected through optical fibers. This substantially expands the clustering distance.

S7700 Series Smart Routing Switches

The S7700 series is available in three models: S7703/S7703-PoE, S7706/S7706-PoE, and S7712. The switching capacity and port density of all three models are expandable.

Troubleshooting S Series Switch Port and Interface Problems

When connecting two devices, check whether optical modules match optical interfaces, whether optical modules match fiber models, and whether optical modules and fibers are connected correctly.
