

Vanuatu FC Fiber Optic Fast Connector

Overview

These fiber optic connectors offer terminations without any hassles and require no epoxy, no polishing, no splicing, no heating and can achieve similar excellent transmission parameters as standard polishing and splicing technology. Our connector can greatly reduce the assembly. FASTConnect® field-installable connectors are factory pre-polished connectors that completely eliminate the need for hand polishing in the field. Proven mechanical splice technology ensuring precision fiber alignment, a factory pre-cleaved fiber stub and a proprietary index-matching gel combine. FC Fast Connectors (FC Field-Installable Connector) are pre-assembled, quick-termination connectors used in fiber optic networks to enable fast and efficient field installations without the need for specialized tools or equipment. It is commonly used with both single-mode optical fiber and polarization-maintaining optical fiber.
