

# What optical module should be used with MA5800

## Overview

The MA5800 supports the PON combo technology, and can work with the built-in WDM1r optical module to support smooth evolution from GPON to XG(S)-PON. It is positioned as an OLT oriented to the ultra-gigabit era. Covers everything from SFP and eSFP all the way up to QSFP28 and the newer Symmetrical 50G-PON combo modules. Full specs, Tx/Rx power levels, wavelengths, connector types, transmission distances, the whole thing. If you're working with GPON, XG-PON. MA5800 is a high-performance XG-PON & GPON Combo PON Optical Transceiver Module designed specifically for use with Huawei MA5800 Series OLTs and compatible multi-vendor systems. This SFP+ form-factor module supports both XG-PON (asymmetric 10G) and GPON (2.5G) technologies in one device, providing. SmartAX MA5800 (MA5800-X17/MA5800-X15/MA5800-X7/MA5800-X2): Access product manuals, HedEx documents, product images and visio stencils.
