

What size router should I pair with a 5 gigabit fiber optic connection

Overview

You'll need a router with a 5 Gbps port at a minimum, and the device you connect directly to the router will need the 5 Gbps port or greater. Selecting a single router can be challenging, as there are most likely many that fit the requirements you want. We've done the research for you and put together this in-depth guide that lists multiple options, their details, reviews, and pros and cons. This should help you make an informed decision. To make use of your 5 Gig connection, you need a router than can handle multi-gig speeds. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. Range. Getting 5gb fiber installed this week at the house and based on my research it looks like only the BE96U, BE98U and AXE16000 have the WAN ports to support this.
