

# What type of fiber optic cable should be used between indoor floors

## Overview

Typical indoor applications include optical fiber distribution and links between building floors. Tight buffer cables provide sturdy yet agile fiber protection for navigating congested indoor spaces. What are the three main types of indoor fiber optic cables?

What are the advantages of using fiber optic cables indoors?

Can I use fiber optic cable in my house?

What are the different types of indoor fiber optic cable jackets?

What is the difference between 900 and 250-micron fiber?

Which type of. At its core, an indoor fiber cable is a type of cable containing one or more optical fibers that are used to carry light. If you're unfamiliar with the fundamental concepts of fiber optic technology, we recommend reading our. To select the appropriate indoor fiber optic cable, it's essential to grasp the fundamental types available. OPGW, all-dielectric self-supporting cable, and OSFP 400G transceivers are part of modern SDGI, so we'll also discuss it.
