

Where can I find a fiber optic communication lab class

Overview

Gain hands-on skills through practical tutorials on YouTube and Udemy, plus theoretical foundations from university courses on edX, covering everything from cable termination to troubleshooting with specialized tools. Select your course and available date with a member of the Fibreplus Training team Complete the Course Registration Form Online Once your deposit is paid, you will receive a registration letter and we will see you on your course. Skills can be demonstrated in hands-on lab exercises and verified by instructors giving an FOA-Approved course or for those already working in the industry, verified industry experience. Abilities: Fiber optic techs need the ability to perform relevant tasks, evidenced by showing skills in hands-on. Professional-level fiber optic training prepares technicians to maintain the fiber optic systems used throughout the telecommunications industry, which transmit both voice and data signals. Whether you are interested in becoming an Installer, a Splicer, a Technician or any other kind of specialist. See the Light® Fiber Optic Training offers courses for all skill levels and schedules! Check our training calendar for current classes.
